

This document is a table of contents for the File of Birds Records by Species, and includes rarities reviewed through 1999.

Records reviewed for a current year were assigned numbers, -01, -02, -03, etc.

Records from a previous year being reviewed for the first time were assigned letters, -AA, -AB, -AC, etc.

A = Accepted, NA = Not Accepted, -D = based on a documentation, -P = based on a photograph,

-S = based on a specimen, -R = based on a recording

ca = circa, < = on or before, E = early, L = late, Wint = winter, Spr = spring, Sum = summer

* = a written documentation, [name (year)] = published article.

Some documenters and articles are not listed (See File of Bird Records by Species for complete details)

All old references to Accidental species with the exception of Greater Prairie-Chicken and Sharp-tailed Grouse were reviewed by the Records Committee (most in 1981 and 1993). It is possible that some were missed, but not many. Any that are not listed here should be brought to the attention of the committee.

Over the years, the status of many species changed to Regular, and then records of these species were no longer reviewed. Some of the records were reviewed because the birds involved were found at a very unusual date.

Many of the records listed here are cited in Dinsmore, J. J., T. H. Kent, D. Koenig, P. C. Petersen, and D. M. Roosa. 1984. *Birds in Iowa*. Iowa State Univ. Press, Ames and in Kent, T. H., and J. J. Dinsmore. 1996. *Birds in Iowa*. Published by the authors, Iowa City.

The species are listed here in taxonomic order based on *The A.O.U. Check-list of North American Birds, Seventh Edition*, 1998. The records for each species are list chronologically.
